

## **Lower Extremity Venous Duplex (DVT Diagnosis) – Image Protocol**

1. Transverse CFV/GSV with and without compression
2. Transverse CFV with and without compression
3. Transverse SFV Proximal with and without compression
4. Transverse SFV Mid with and without compression
5. Transverse SFV Distal with and without compression
6. Transverse POP with and without compression
7. Transverse Peroneal/PTV (proximal calf vessels) with and without compression
8. Transverse PTV Distal with and without compression
9. Long CFV with Color
10. Long CFV with PW Doppler (include valsalva and/or proximal augmentation as well as distal augmentation)
11. Long SFV Proximal with Color
12. Long SFV Mid with Color
13. Long SFV Distal with Color
14. Long POP/LSV with Color
15. Long POP with PW Doppler (include distal and proximal augmentation)
16. Long PTV Distal with Color

***If unilateral exam – IMAGE and DOPPLER contralateral CFV***
